

PRO AFP to Data

Leverage AFP data with XML and CSV applications

PRO AFP to Data dynamically converts AFP print files into data files, like XML and CSV, that can be used in common business and database applications. The software allows you to leverage the data value and technology infrastructure associated with high volume AFP print streams without incurring any IT modification costs.

Platform Independence

PRO AFP to Data is available on Linux, AIX, Solaris, HP-UX, z/OS and Windows platforms. This means that users can install the software where they need it.

Features and Benefits

- Resource management is automated.
- Conversion throughput and performance are optimized.
- The converted text files faithfully render the textual content of the input AFP files.
- Conversion enables flexible print workload balancing: a single printer can be used for printing XML and CSV data and AFP print files, eliminating the need for duplicate printing format infrastructure.
