

PRO AFP to PDF/A

Use PRO AFP to PDF/A conversion software to preserve the visual appearance of your archived AFP documents over the long term and meet the legal and regulatory requirements for long term archiving

If your production operation creates customer-focused AFP documents that need to be archived for a long period of time, you are bound to face technological, legal and regulatory challenges dealing with how to store and retrieve these documents long term. Crawford Technologies' **PRO AFP to PDF/A** provides a solution to your problems.

Crawford Technologies offers **PRO AFP to PDF/A**, a cost-effective, platform-independent product that takes your production AFP print streams and converts them into PDF/A-1b output ready to archive.

PRO AFP to PDF/A:

- Converts your production AFP print streams to archive-ready PDF/A
- Creates PDF/A-1b output
- Works on a wide variety of platforms, including Windows, Solaris, AIX, HP-UX, Linux and z/OS
- Indexes the **PDF/A** files and creates an external index for archive load

PRO AFP to PDF/A:

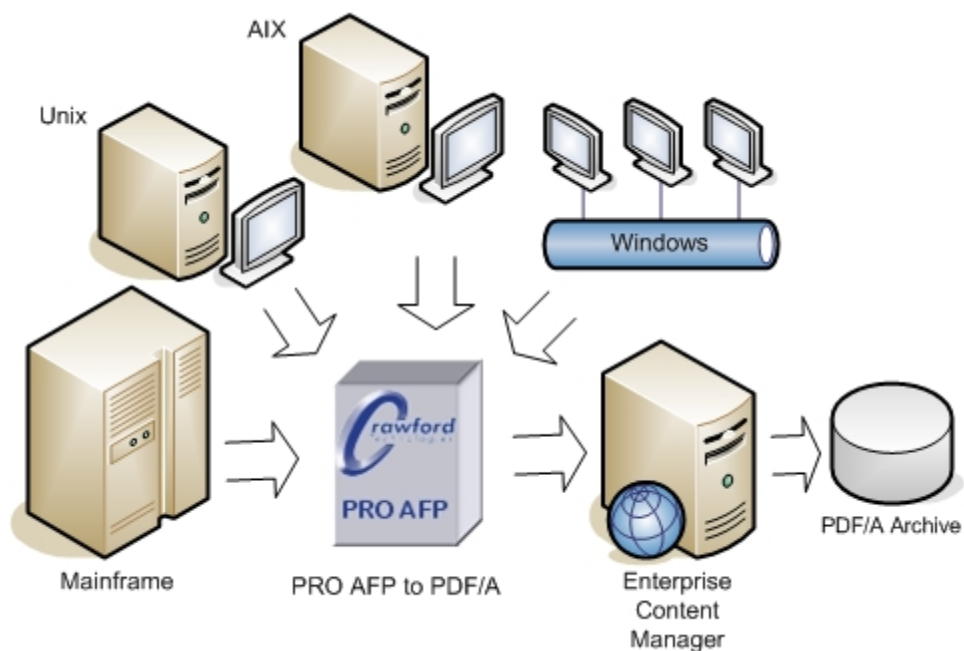

- Provides superior font management: it maps bitmap fonts to PDF Type 1 fonts. Automatically converts and embeds AFP Contour fonts. Custom fonts are automatically converted to PDF Type 3 fonts.
- Uses **PDF/A** overlays to emulate pre-printed form stock. This makes the creation of watermarks easy, allowing the full power of **PDF/A** to be utilized within legacy applications. This approach can be used to add full color graphics and Terms and Conditions pages.
- Uses object-to-object **AFP to PDF/A** transformation rather than object-to-bitmap transforms. This approach produces **PDF/A** files optimized for archiving.
- Bookmarks any data in the print file which automatically organizes it into multiple levels for easy navigation within the document.
- Lets you set up index rules to create external indices on multiple criteria
- Supports advanced AFP capabilities including BCOCA, color IOCA (FS42/FS45), contour fonts and TLE indexing.

The **PRO AFP to PDF/A** transform has all the capabilities of the **PRO AFP to PDF** transform (PDF v. 1.4) allowed under the PDF/A-1b standard.

PRO AFP to PDF/A runs on multiple platforms, which allows you to install your software where you need it:

- z/OS
- Windows
- AIX
- Solaris
- Linux
- HP-UX

PRO AFP to PDF/A is Generally Available for immediate use. For more information on how you can use **PRO AFP to PDF/A** to solve your long-term archive problems, [Contact Us](#) today.

PDF/A is an international standard (ISO 19005-1), promoted by the PDF/A Competence Center (www.pdfa.org). When documents are archived in the **PDF/A** format, the rendered visual appearance of the document will be reproducible over the long-term, irrespective of any hardware or software changes, exactly as the law demands.
