

PRO Image to PDF

PRO Image to PDF provides an easy migration path for customers who want to move TIFF images to PDF architecture without making costly application modifications.

Crawford Technologies Inc. provides a cost-effective, host-based software tool that enables customers to add images from scanners or archives to transactional data to create important new customer or internal use documents, such as image statements, manufacturing documentation, invoices and notices.

PRO Image to PDF creates images that are perfect representations of the original TIFF files. During the conversion, **PRO Image to PDF** can optimize TIFF images for archiving, retrieval and display using powerful [PRO](#) options.

PRO Image to PDF can also be used by interactive applications to convert TIFF legacy documents dynamically at display or retrieval time. The high-speed performance of **PRO Image to PDF** permits this dynamic conversion. This can save significant data storage costs and eliminate expensive batch transformation processing.

Whether organizations want to archive and retrieve their TIFF documents or to make them available to both staff and customers in an interactive mode, **PRO Image to PDF** is the key enabler: it provides high-fidelity images of the business data in a highly popular and easily displayable format.

PRO Image to PDF is available on AIX, Linux, Solaris, HP-UX, z/OS and Windows platforms allowing users to install the software where they need it.
