

PRO Line Data to AFP

Move your ASCII and/or EBCDIC line data to the AFP high-volume printing environment.

PRO Line Data to AFP provides an easy migration path for customers who want to move legacy mainframe line data, like ASCII and EBCDIC, to the AFP architecture without making costly application modifications.

Standard AFP files can be printed with high-speed and stability indispensable in high volume printing environments.

Platform Independence

PRO Line Data to AFP is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

Features and Benefits

- Resource management is automated.
- Conversion throughput and fidelity are optimized.
- Compact AFP files are optimized for high-speed production printing.
- Conversion enables flexible print workload balancing: a single printer can be used for printing ASCII, EBCDIC and AFP print files, eliminating the need for duplicate printing format infrastructure.
