

# PRO Line Data to Data

*Leverage your ASCII and/or EBCDIC line data with XML and/or CSV data*

**PRO Line Data to Data** converts legacy mainframe line data, like ASCII and EBCDIC, into common business data files, like XML and CSV that can be used in a variety of enterprise and database applications. The software allows you to leverage the value and infrastructure associated with legacy applications without incurring any IT modification costs.

## Platform Independence

**PRO Line Data to Data** is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

## Features and Benefits

- Resource management is automated.
- Conversion throughput and performance are optimized.
- The converted XML or CSV data are faithful representations of the original line data files.
- Conversion enables flexible print workload balancing: a single printer can be used for printing ASCII, EBCDIC, XML or CSV files, eliminating the need for duplicate printing format infrastructure.
