

PRO Line Data to HTML

Get your ASCII and/or EBCDIC data online

PRO Line Data to HTML converts Xerox common line data, like ASCII and EBCDIC, into HTML. This allows organizations to use line data in Web applications and leverage the value of legacy applications.

Platform Independence

PRO Line Data to HTML is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

Features and Benefits

- Resource management is automated.
- Conversion throughput and performance are optimized.
- The converted HTML files are faithful representations of the original line data files and are fully searchable.
- The converted images may be dynamically optimized for web display, using our powerful PRO options
- You can use such html files in EBP (Electronic Bill Presentment) or EBPP (Electronic Bill Presentment and Payment) systems; for instance to display transaction statements on the web for authorized users.
- Conversion enables flexible print workload balancing: a single printer can be used for printing ASCII, EBCDIC and HTML files, eliminating the need for duplicate printing format infrastructure.
