

PRO Line Data to Image

Convert your line data for high volume archiving

PRO Line Data to Image offers the best performance available for conversions from ASCII and EBCDIC to image files like TIFF or PNG. This handy tool provides a clear migration path for customers looking to mesh these legacy files with the organization's ECM systems and establish a high-volume archive of printer line data – both without making costly architecture changes.

Platform Independence

PRO Line Data to Image is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

Features and Benefits

- Resource management is automated.
- Conversion throughput and performance are optimized.
- The converted TIFF and PNG images are perfect representations of the original line data files.
- The converted images may be optimized for archiving, retrieval and display, using our powerful PRO options
- Conversion enables flexible print workload balancing: a single printer can be used for printing ASCII, EBCDIC, and TIFF and PNG images, eliminating the need for duplicate printing format infrastructure.
- TIFFOutput images provide superb archival flexibility, for example by page, by customer or by transaction.
