

# PRO Line Data to Metacode

*Move your line data to a high volume printing environment*

**PRO Line Data to Metacode** provides an easy migration path for customers who want to move legacy mainframe line data, like ASCII and EBCDIC to Xerox architecture without making costly application modifications. Standard Xerox Metacode files can be printed with high speed performance and stability indispensable in high volume printing environments.

## Platform Independence

**PRO Line Data to Metacode** is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

## Features and Benefits

- Resource management is automated.
- Conversion throughput and fidelity are optimized.
- Compact output metacode files are optimized for high-speed production printing.
- Conversion enables flexible printer work balancing: a single printer can be used for printing LCDS, Metacode, ASCII and EBCDIC eliminating the need for duplicate printing format infrastructure.
