

PRO Line Data to PCL

Leverage ASCII and EBCDIC files in PCL desktop environment

PRO Line Data to PCL converts common line data, like ASCII and EBCDIC, into PCL. This provides a clear migration path for customers looking to establish a link between the data value of legacy mainframe applications and the common platform of PCL network printing.

Platform Independence

PRO Line Data to PCL is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

Features and Benefits

- Resource management is automated.
- Conversion throughput and performance are optimized.
- The converted PCL files are faithful representations of the original line data files.
- Conversion enables flexible print workload balancing: a single printer can be used for printing ASCII, EBCDIC and PCL print files, eliminating the need for duplicate printing format infrastructure.
