

PRO Line Data to PS

Leverage ASCII and EBCDIC files in PostScript production environment

PRO Line Data to PS converts common line data, like ASCII and EBCDIC, into PostScript. This provides a clear migration path for customers looking to establish a link between the data value of legacy mainframe applications and the common platform of PostScript printing.

Platform Independence

PRO Line Data to PS is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

Features and Benefits

- Resource management is automated.
- Conversion throughput and fidelity are optimized.
- Output is optimized for production speed and performance.
- Conversion enables flexible print workload balancing: a single printer can be used for printing Postscript and ASCII and EBCDIC files eliminating the need for duplicate printing format infrastructure.
