

PRO Line Data to Text

Leverage your ASCII and/or EBCDIC line data with text data

PRO Line Data to Text lets you convert common line data, like ASCII and EBCDIC, into text files. This handy tool provides a bridge between legacy mainframe applications and the common ground of text files which can be used for a variety of business and enterprise applications.

Platform Independence

PRO Line Data to Text is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

Features and Benefits

- Resource management is automated.
- Conversion throughput and performance are optimized.
- The converted text files are faithful representations of the original line data files.
- Conversion enables flexible print workload balancing: a single printer can be used for printing ASCII, EBCDIC and text files, eliminating the need for duplicate printing format infrastructure.
