

PRO Meta to Data

Leverage Metacode data with XML and CSV applications

PRO Meta to Data lets you convert Xerox Metacode into data files, like XML and CSV, that can be used in common business and database applications. The software allows you to leverage the value and infrastructure associated with legacy Xerox print streams without incurring any IT modification costs.

Platform Independence

PRO Meta to Data is available on Linux, AIX, Solaris, HP-UX, z/OS (all versions) and Windows platforms. This means that users can install the software where they need it.

Features and Benefits

- Resource management is automated.
- Conversion throughput and performance are optimized.
- The converted text files faithfully render the textual content of the input Metacode files.
- Conversion enables flexible print workload balancing: a single printer can be used for printing XML and CSV data and Metacode print files, eliminating the need for duplicate printing format infrastructure.
