

PRO Meta to HTML

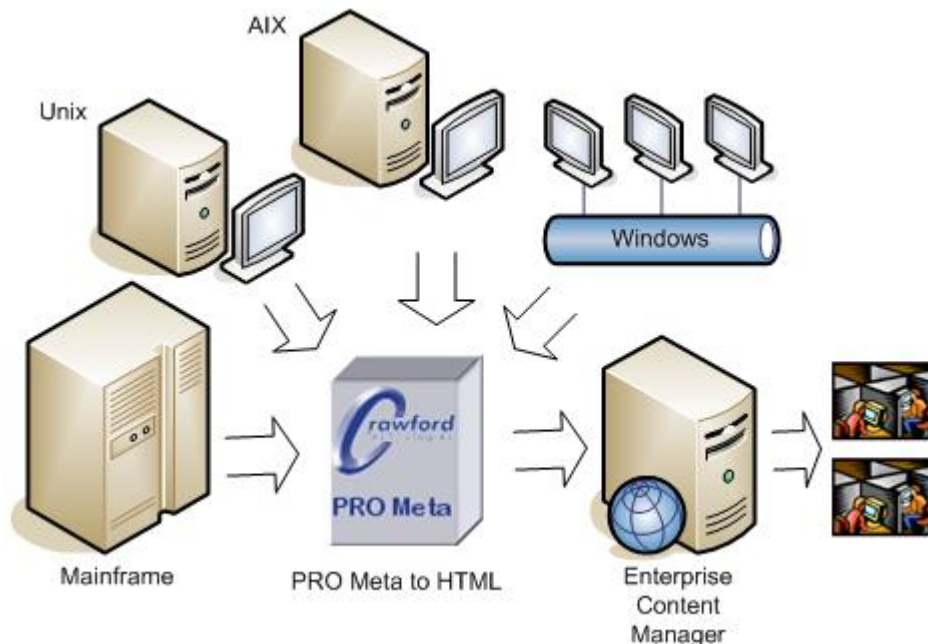

View Legacy Documents Online

PRO Meta to HTML software is designed for customers, who want to leverage Xerox legacy documents on the Web to improve productivity and bring excellence to their Customer Service.

PRO Meta to HTML dynamically converts Xerox Metacode, LCDS (Line Conditioned Data Stream), and Line Data documents into HTML for viewing in web browsers.

PRO Meta to HTML allows organizations to utilize Xerox legacy application print files in Web applications. Documents, such as customer statements, bills, invoices, policies and confirmations, can be displayed in standard browsers giving customer service agents and customers instant online access to the relevant company data. Web documents can also be printed by or emailed to any of those users.

Making documents available quickly and in the same format to customer service staff and to the customers improves productivity and customer satisfaction and allows organizations to provide excellence in Customer Relations Management and improve productivity.

Platform Independence

PRO Meta to HTML is available on Linux, AIX, Solaris, HP-UX, z/OS and Windows platforms. This means that users can install the software where they need it.
