

# PRO Meta to PDF/A

---

*Use PRO Meta to PDF/A conversion software to preserve the visual appearance of your archived Xerox Metacode/LCDS documents over the long term and meet the legal and regulatory requirements for long term archiving*

If your production operation creates customer-focused Metacode/LCDS documents that you need to archive for a long period of time, you are bound to face technological, legal and regulatory challenges dealing with how to store and retrieve these documents long term. Crawford Technologies' **PRO META to PDF/A** provides a solution to your problems.

Crawford Technologies offers **PRO META to PDF/A**, a cost-effective, platform-independent product that takes your production Metacode/LCDS print streams and converts them into PDF/A-1b output ready to archive.

## **PRO META to PDF/A:**

- Converts your production Metacode/LCDS print streams to archive-ready PDF/A
- Creates PDF/A-1b output
- Works on a wide variety of platforms, including Windows, Solaris, AIX, HP-UX, Linux and z/OS
- Indexes the **PDF/A** files and creates an external index for archive load

## **PRO META to PDF/A:**

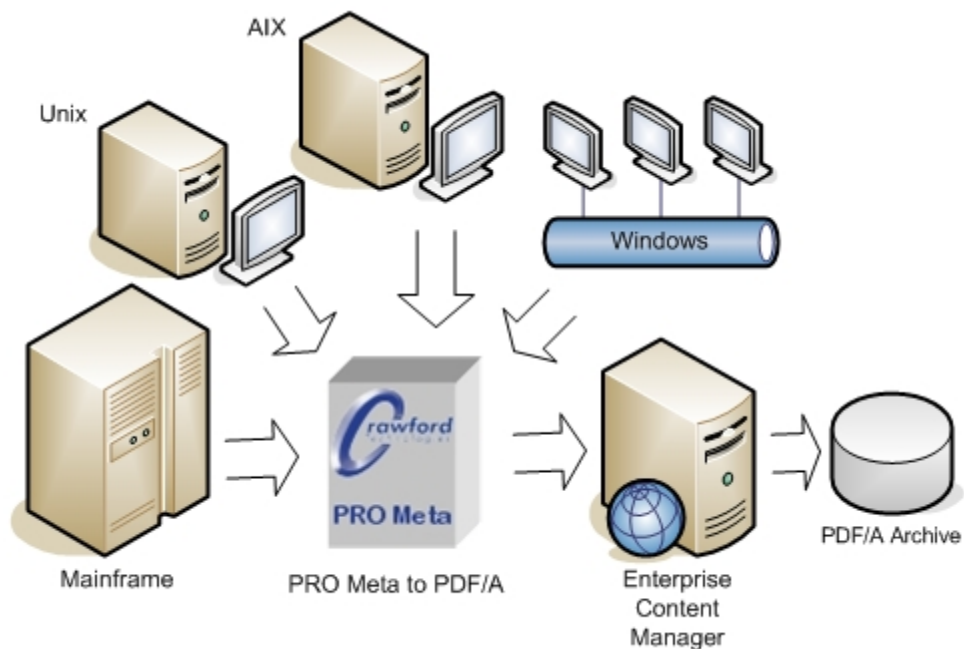

- Provides superior font management: it maps bitmap fonts to PDF Type 1 fonts. Custom fonts are automatically converted to PDF Type 3 fonts.
- Uses **PDF/A** overlays to emulate pre-printed form stock. This makes the creation of watermarks easy, allowing the full power of **PDF/A** to be utilized within legacy applications. This approach can be used to add full color graphics and Terms and Conditions pages
- Uses object-to-object **META to PDF/A** transformation rather than object-to-bitmap transforms. This approach produces **PDF/A** files optimized for archiving
- Bookmarks any data in the print file which automatically organizes it into multiple levels for easy navigation within the document.
- Lets you set up index rules to create external indices on multiple criteria
- Supports all Xerox capabilities including highlight color

The **PRO META to PDF/A** transform has all the capabilities of the **PRO META to PDF** transform (PDF v. 1.4) allowed under the PDF/A-1b standard.

**PRO META to PDF/A** runs on the following platforms:

- z/OS
- Windows
- AIX
- Solaris
- Linux
- HP-UX

**PRO META to PDF/A** is Generally Available for immediate use. For more information on how you can use **PRO META to PDF/A** to solve your long-term archive problems, [Contact Us](#) today.

**PDF/A** is an international standard (ISO 19005-1), promoted by the PDF/A Competence Center (<http://www.pdfa.org>). When documents are archived in the **PDF/A** format, the rendered visual appearance of the document will be reproducible over the long-term, irrespective of any hardware or software changes, exactly as the law demands.
