

PRO PCL to HTML

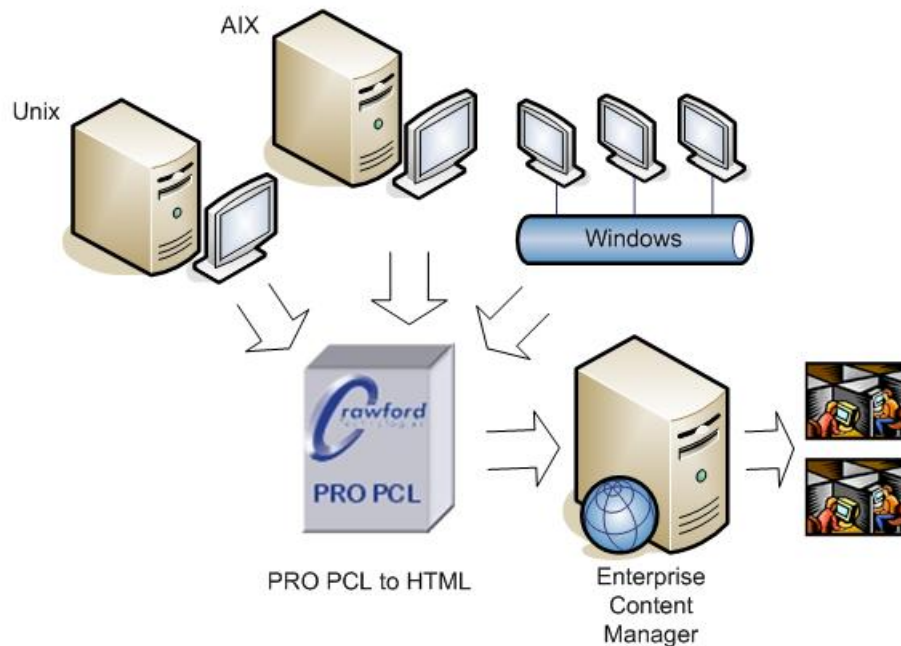

Take PCL Output from New Generation Applications Online

PRO PCL to HTML software is designed for customers, who want to leverage PCL output from new generation applications on the Web, to improve productivity and bring excellence to their Customer Service.

PRO PCL to HTML delivers high-speed performance that permits dynamic conversion of PCL documents into HTML for viewing on the Web.

PRO PCL to HTML allows organizations to use PCL print files in interactive Web applications. Documents as varied as customer bills, broker statements, invoices, insurance policies, marketing materials, guidelines and confirmations, can be displayed in standard browsers giving customer service agents and customers instant online access to the relevant company data. Web documents can also be printed by or emailed to any of those users. These capabilities open the door to Electronic Bill Presentation & Payment (EBPP). Crawford Technologies has been providing components for EBP and EBPP solutions since 1996. Major vendors in this market use our technology.

Making documents available quickly and in the same format to customer service staff and to the customers improves customer satisfaction, allowing organizations to achieve excellence in Customer Relations Management and improve productivity.

Platform Independence

PRO PCL to HTML is available on Linux, AIX, Solaris and Windows platforms. This means that users can install the software where they need it.
