

PRO PCL to PDF/A

Use PRO PCL to PDF/A conversion software to preserve the visual appearance of your archived PCL documents over the long term and meet the legal and regulatory requirements for long term archiving

If your production operation creates customer-focused PCL documents that you need to archive for a long period of time, you are bound to face technological, legal and regulatory challenges dealing with how to store and retrieve these documents long term. Crawford Technologies' **PRO PCL to PDF/A** provides a solution to your problems.

Crawford Technologies offers **PRO PCL to PDF/A**, a cost-effective, platform-independent product that takes your production PCL print streams and produces PDF/A-1b output ready to archive.

PRO PCL to PDF/A:

- Converts your production PCL print streams to archive-ready PDF/A
- Creates PDF/A-1b output
- Works on a wide variety of platforms, including Windows, Solaris, AIX, HP-UX and Linux
- Indexes the **PDF/A** files and creates an external index for archive load

PRO PCL to PDF/A:

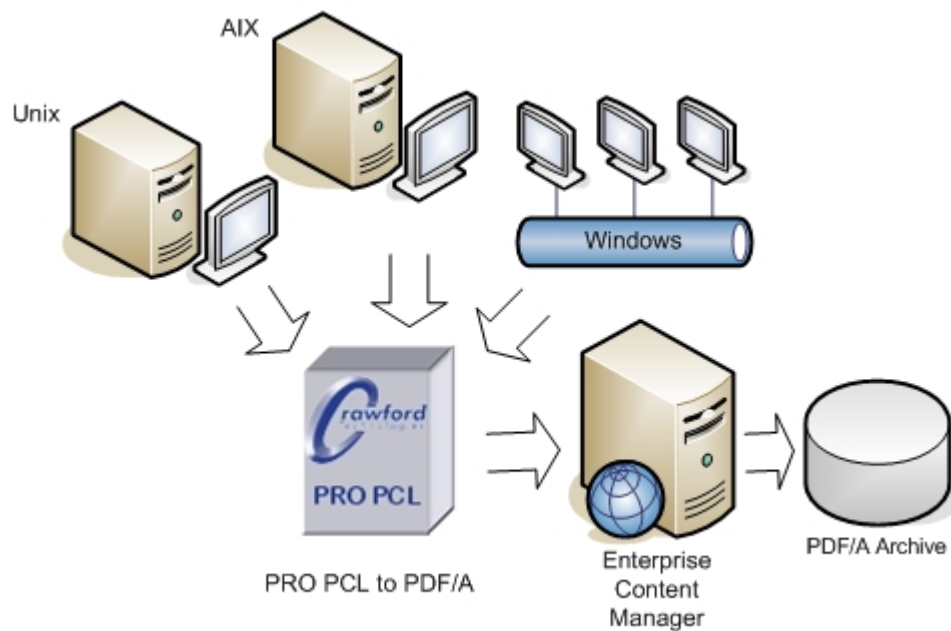

- Provides superior font management: it maps bitmap fonts to PDF Type 1 fonts. Custom fonts are automatically converted to PDF Type 3 fonts.
- Uses **PDF/A** overlays to emulate pre-printed form stock. This makes the creation of watermarks easy, allowing the full power of **PDF/A** to be utilized within legacy applications. This approach can be used to add full color graphics and Terms and Conditions pages.
- Uses object-to-object **PCL to PDF/A** transformation rather than object-to-bitmap transforms. This approach produces **PDF/A** files optimized for archiving.
- Bookmarks any data in the print file which automatically organizes it into multiple levels for easy navigation within the document.
- Index rules can be set up to create external indices on multiple criteria

The **PRO PCL to PDF/A** transform has all the capabilities of the **PRO PCL to PDF** transform (PDF v. 1.4) allowed under the PDF/A-1b standard.

PRO PCL to PDF/A runs on the following platforms:

- Windows
- AIX
- Solaris
- Linux

PRO PCL to PDF/A is Generally Available for immediate use. For more information on how you can use **PRO PCL to PDF/A** to solve your long-term archive problems, [Contact Us](#) today.

PDF/A is an international standard (ISO 19005-1), promoted by the PDF/A Competence Center (<http://www.pdfa.org>). When documents are archived in the **PDF/A** format, the rendered visual appearance of the document will be reproducible over the long-term, irrespective of any hardware or software changes, exactly as the law demands.
