

# PRO PDF Normalization

**PRO PDF Normalization** delivers a cross-platform solution that combines integrated, fast, accurate PDF normalization with conversion, document reengineering, tailoring, indexing and enhancement.

**PRO PDF Normalization** provides a number of uses such as:

- Optimizing applications for better printer throughput
- Splitting large PDF or print files into multiple PDF files
- Selecting pages for reprint purposes
- Indexing and text extraction
- Document Reengineering with the optional **PRO Document Enhancer**

By dynamically interpreting and normalizing PDF print-streams and PDF files clients can get the powerful capabilities of the [PRO Splitter](#), [PRO Indexer](#), [PRO Concatenator](#), [PRO Document Enhancer](#) and [PRO Reprint and Recovery](#).

The **PRO PDF Normalization** product interprets PDF files and resources and converts them into standard normalized PDF files. These individual normalized files can then be sent directly to a printer, archived or converted into other print formats.

**PRO PDF Normalization** is available on Windows, Solaris and Linux.
