

PRO PS to HTML

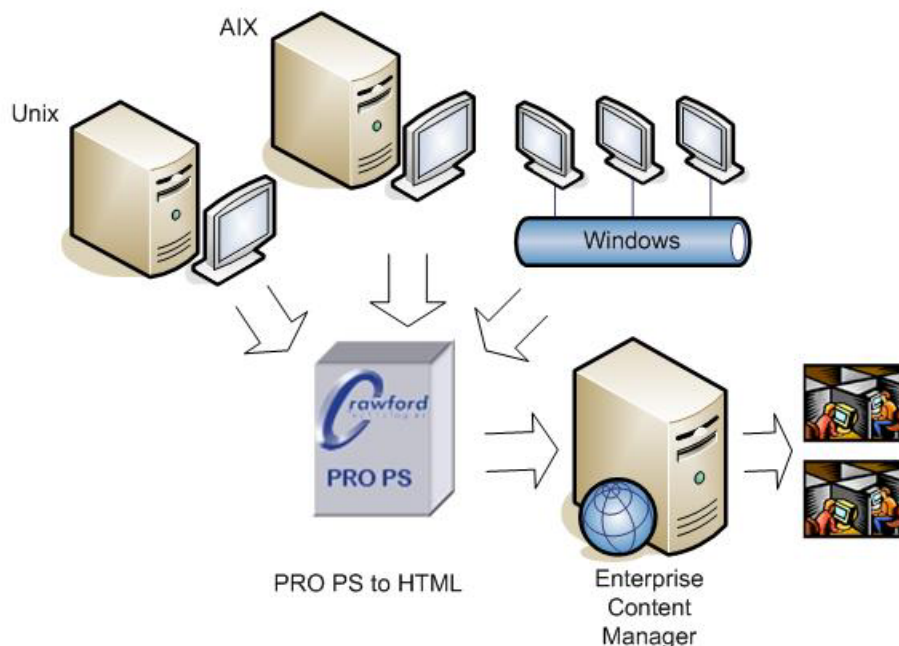

Take PostScript Output from New Generation Applications Online

PRO PS to HTML software is designed for customers, who want to leverage PostScript output from new generation applications on the Web, to improve productivity and bring excellence to their Customer Service.

PRO PS to HTML delivers high-speed performance that permits dynamic conversion of PostScript documents into HTML for viewing on the Web.

PRO PS to HTML allows organizations to use PostScript print files in interactive Web applications. Documents as varied as customer bills, broker statements, invoices, insurance policies, marketing materials, guidelines and confirmations, can be displayed in standard browsers giving customer service agents and customers instant online access to the relevant company data. Web documents can also be printed by or emailed to any of those users. These capabilities open the door to Electronic Bill Presentation & Payment (EBPP). Crawford Technologies has been providing components for EBP and EBPP solutions since 1996. Major vendors in this market use our technology.

Making documents available quickly and in the same format to customer service staff and to the customers improves productivity and customer satisfaction and allows organizations to achieve excellence in Customer Relations Management and improve productivity.

Platform Independence

PRO PS to HTML is available on Linux, AIX, Solaris and Windows platforms. This means that users can install the software where they need it.
