Press Release:

Crawford Technologies Introduces **Metacode to PostScript Functionality**

Toronto, Ontario, March 1, 2002 - Crawford Technologies Inc. today introduced their newest printing solution, **PRO** Meta to PS which converts Xerox LCDS and Metacode documents to PostScript for printing on PostScript printers. PRO Meta to PS allows a single printer to be used for printing PostScript and LCDS/Metacode output. The product handles all LPS DJDE/JSL functions and dynamically converts print resources, as needed.

Output PostScript is optimized for performance. Custom fonts and logos are dynamically transformed to PostScript, providing superior image fidelity. Shading patterns can be made darker or lighter as needed "With **PRO** Meta to PS, no application modification is required; Customers can easily incorporate new printer and communications technology without modifying their applications" states Ernie Crawford, President of Crawford Technologies Inc.

"The transition from Metacode and LCDS to PostScript is a natural progression for Xerox customers" adds Jay Pollitt, Vice President Sales, Western Region, "and PRO Meta to PS provides the ideal solution for customers."

PRO Meta to PS is available on all Windows operating systems as well as Solaris, AIX, Linux and HP-UX.

PRO Meta to PS supports highlight color mapping, multiple copy, tumble, duplex or simplex printing on Letter, Legal, A4 and custom paper sizes.

About Crawford Technologies Inc.

Crawford Technologies Inc. provides print stream transform, extraction and manipulation solutions that are unsurpassed in the industry. With our committed and knowledgeable product teams, Crawford provides unparalleled development, design and support. Crawford is a global leader in providing advanced print production transformation products for the financial, insurance, medical, government, and telecommunications industry. Crawford's powerful suite of conversion and enhancement products automates the transformation of print-stream, data manipulation and document output. Crawford Technologies Inc. is based in Canada. Our Toronto and Vancouver development centers produce high quality, cross-platform products using advanced development and testing techniques such as white box testing, daily builds and automated regression tests. Our sales and marketing activities are coordinated in Colorado.
