

Composition Research Technologies AG Announces Master Distributor Agreement with Crawford Technologies Inc.

Zurich, December 22nd, 2005. Crawford Technologies Inc. and Composition Research Technologies AG have signed a master distribution agreement for the Crawford PRO Suite of products and its sales, integration and support within the European market.

The PRO suite of products provides conversion of print streams including Xerox Metacode, LCDS, AFP, MO:DCA-P, PCL, PostScript, PDF, Flat File, Line Print, ASCII, EBCDIC, into other formats including PDF, PostScript, AFP, PCL, XML, HTML, TIFF images, Xerox Metacode and CSV files. These products run on Windows, UNIX, Linux, HP-UX, Solaris, AIX, z/OS, OS/390 and MVS systems.

Additional capabilities include print file splitting, indexing, document reengineering, text extraction, data mining, Windows, UNIX, JES2 and JES3 output management solutions.

Crawford Technologies transform software is recognized in the industry for its quality and performance and is therefore used by a wide variety of solution providers and customers enabling them to easily integrate new printer, archiving and communications technology, without modifying their legacy applications.

"We are excited about having the ability to provide European customers with any-to-any data conversions, data enhancement and indexing solutions that meet their performance and reliability requirements", said Dr. Richard C. Schlupp, President of Composition Research Technologies AG.

Ernie Crawford, President of Crawford Technologies Inc. adds "We are very happy to have an organization with CRTEurope's skills, experience and integrity to deliver our products to the European market, as the demand in the European market for our products is growing quickly".
